

The AFS Casting of The Year Award is awarded for castings that lead the industry in technological advancement of design and metallurgy.

Fansteel/Wellman Dynamics was awarded the prestigious AFS Casting of The Year award for engineering and production achievements in the manufacture of the Intermediate Case for Jet Engine application. The combination of the Gearbox and Front Frame achieved through concurrent engineering efforts in the development of this part has expanded the envelope of modern industrial casting technology. Pratt & Whitney Canada is the customer for this casting.

Use of Magmasoft Solidification Software for a period of one year without charge accompanies this award.
